

ProfeLAC[®]

BEEF

High quality nutrition and essential nutrients, ideal for calf rearers looking for a cost effective and easy alternative to whole milk.

A high quality, casein based milk replacer formulated to promote growth and muscle development

- ✓ Highly digestible protein and fat, to support early growth
- ✓ Scientifically proven prebiotics, probiotics and postbiotics support optimal gut health, immunity and gastrointestinal tract development
- ✓ Added vitamins and minerals support early health, immunity and skeletal development
- ✓ Natural betaine aids hydration and supports energy utilisation
- ✓ Antibiotic and coccidiostat free

High quality ingredients are carefully processed to ensure optimal digestibility, making **ProfeLAC[®] BEEF** an easy to mix formula, suited to both restricted and *ad lib* feeding systems.

ProfeLAC[®] BEEF is specifically formulated to promote growth and muscle development. With added vitamins and trace minerals, and a comprehensive gut health package, **ProfeLAC[®] BEEF** provides all the essential nutrients required for optimal health and well-being.

20% | **20%**
FAT | **PROTEIN**

ProfeLAC[®] BEEF provides flexibility and is ideal for use in *ad lib* feeding systems, antibiotic free systems and for fortification of whole milk. It can also be used effectively in both once and twice a day systems.

ProfeLAC[®] BEEF

High quality nutrition and essential nutrients, ideal for calf rearers looking for a cost-effective and easy to use alternative to whole milk.

Formulated with the NZ Beef market in mind, **ProfeLAC[®] BEEF** is a highly digestible calf milk replacer formulated to support lean tissue growth and development in beef and dairy-beef calves. It can be used effectively in restricted and *ad lib* rearing systems.

Coccidiostat free, **ProfeLAC[®] BEEF** is ideally suited to antibiotic free calf rearing systems and those systems where higher dry matter intakes are required (e.g. when fortifying whole milk).

FEATURE	BENEFIT	PRACTICAL IMPLICATIONS
 Premium quality casein-based milk replacer	<ul style="list-style-type: none"> Highly digestible fats and proteins 	<ul style="list-style-type: none"> Suitable for calves from 4 days old Increased nutrient utilisation = value for money Supports better growth rates Reduced risk of nutritional scours
 Easymix technology	<ul style="list-style-type: none"> Consistent small particle size Stays in suspension 	<ul style="list-style-type: none"> Highly soluble - mixes easily, even in cold water or milk More consistent calf growth Ideal for use in <i>ad lib</i> systems
 Can be used to fortify whole milk	<ul style="list-style-type: none"> Increases calf nutrient intake 	<ul style="list-style-type: none"> Enhanced early growth rates (particularly important for once-a-day systems) Supports early hard feed intake
 Added gut health package	<ul style="list-style-type: none"> Scientifically proven probiotics, prebiotics and postbiotics Added vitamins and minerals 	<ul style="list-style-type: none"> Supports early gut health and development for improved nutrient utilisation Supports skeletal and immune development
 Natural betaine	<ul style="list-style-type: none"> Aids hydration Improved energy utilisation 	<ul style="list-style-type: none"> Aids maintenance and growth of papillae Aids recovery from health challenges Supports increased early growth
 Coccidiostat free	<ul style="list-style-type: none"> Free of ionophores and antibiotics No withholding period Flexibility 	<ul style="list-style-type: none"> Ideal for antibiotic free rearing systems Suitable for bobby calves Can be fed at elevated rates or in combination with transition or whole milk to support increased growth rates
 Pasteurised	<ul style="list-style-type: none"> Free of any potential pathogens 	<ul style="list-style-type: none"> Eliminates risk of disease transmission (e.g. Johnes disease and <i>M. bovis</i>)
